

# IEEE TRANSACTIONS ON ANTENNAS AND PROPAGATION

A PUBLICATION OF THE IEEE ANTENNAS AND PROPAGATION SOCIETY

SEPTEMBER 2010

VOLUME 58

NUMBER 9

IETPAK

(ISSN 0018-926X)

---

## PAPERS

### *Antennas*

- A Wideband Aperture-Coupled Microstrip Patch Antenna Employing Spaced Dielectric Cover for Enhanced Gain Performance ..... *C. J. Meagher and S. K. Sharma* 2802
- Microstrip Patch Antennas With Enhanced Gain by Partial Substrate Removal ..... *S. B. Yeap and Z. N. Chen* 2811
- Broadband, Miniaturized Stacked-Patch Antennas for L-Band Operation Based on Magneto-Dielectric Substrates ..... *F. Namin, T. G. Spence, D. H. Werner, and E. Semouchkina* 2817
- Wideband Phase-Reversal Antenna Using a Novel Bandwidth Enhancement Technique ..... *N. Yang, C. Caloz, and K. Wu* 2823
- Design, Fabrication, and Measurement of a One-Dimensional Periodically Structured Surface Antenna ..... *H. R. Stuart* 2831
- Integrated Planar Monopole Antenna With Microstrip Resonators Having Band-Notched Characteristics ..... *D.-Z. Kim, W.-I. Son, W.-G. Lim, H.-L. Lee, and J.-W. Yu* 2837
- 3-D Radome-Enclosed Aperture Antenna Analyses and Far-Side Radiation ..... *I. V. Sukharevsky, S. V. Vazhinsky, and I. O. Sukharevsky* 2843
- Platform Embedded Slot Antenna Backed by Shielded Parallel Plate Resonator ..... *W. Hong and K. Sarabandi* 2850

### *Arrays*

- Low Probability of Intercept Antenna Array Beamforming ..... *D. E. Lawrence* 2858
- Analysis of a Wavelength-Scaled Array (WSA) Architecture ..... *R. W. Kindt and M. N. Vouvakis* 2866
- Design of Broadband, Single Layer Dual-Band Large Reflectarray Using Multi Open Loop Elements ..... *M. R. Chaharmir, J. Shaker, N. Gagnon, and D. Lee* 2875
- Near Field Focusing Using Phase Conjugating Impedance Loaded Wire Lens ..... *O. Malyuskin and V. Fusco* 2884

### *Complex Media*

- Electromagnetic Coupling Reduction in High-Profile Monopole Antennas Using Single-Negative Magnetic Metamaterials for MIMO Applications ..... *M. M. Bait-Suwailam, M. S. Boybay, and O. M. Ramahi* 2894
- Diffraction by a Planar Metamaterial Junction With PEC Backing ..... *G. Gennarelli and G. Riccio* 2903
- Sub-Wavelength Elliptical Patch Antenna Loaded With  $\mu$ -Negative Metamaterials ..... *P. Y. Chen and A. Alù* 2909

### *Electromagnetics*

- Numerical Modeling for the Analysis of Plasmon Oscillations in Metallic Nanoparticles ..... *G. Miano, G. Rubinacci, and A. Tamburrino* 2920

---

(Contents Continued on p. 2801)

---

Closed-Form Uniform Asymptotic Expansions of Green's Functions in Layered Media .....	R. R. Boix, A. L. Fructos, and F. Mesa	2934
<i>Numerical</i>		
High-Order Interface Treatment Techniques for Modeling Curved Dielectric Objects .....	J. Wang, W.-Y. Yin, P.-G. Liu, and Q.-H. Liu	2946
Analysis of Structures Containing Sharp Oblique Metal Edges in FDTD Using MAMPs ....	C. J. Railton and D. L. Paul	2954
<i>Propagation</i>		
A Hybrid Model for Radio Wave Propagation Through Frequency Selective Structures (FSS) .....	M. Yang and A. K. Brown	2961
Broadband Antireflective Properties of Inverse Motheye Surfaces .....	M. S. Mirotznik, B. L. Good, P. Ransom, D. Wikner, and J. N. Mait	2969
<i>Scattering</i>		
A Novel Procedure for High Resolution Radar Signature Prediction of Near Field Targets .....	M. Sui and X. Xu	2981
The First-Order High Frequency Radar Ocean Surface Cross Section for an Antenna on a Floating Platform .....	J. Walsh, W. Huang, and E. Gill	2994
Fast Computation of Angular Responses of Large-Scale Three-Dimensional Electromagnetic Wave Scattering .....	Z. Peng, M. B. Stephanson, and J.-F. Lee	3004
<i>Wireless</i>		
A Novel Multilayer UWB Antenna on LTCC .....	Y.-Q. Zhang, Y.-X. Guo, and M. S. Leong	3013
Self-Assembled Monopole Antennas With Arbitrary Shapes and Tilt Angles for System-on-Chip and System-in-Package Applications .....	A. Mahanfar, S.-W. Lee, A. M. Parameswaran, and R. G. Vaughan	3020
A Wideband DVB Forked Shape Monopole Antenna With Coupling Effect for USB Dongle Application .....	C.-H. Hsu and S.-J. Chung	3029
Planar UHF RFID Tag Antenna With Open Stub Feed for Metallic Objects .....	L. Mo and C. Qin	3037

---

COMMUNICATIONS

A Sparse Factorization for Fast Computation of Localizing Modes .....	Y. Xu, X. Xu, and R. J. Adams	3044
Active Integrated Wearable Textile Antenna With Optimized Noise Characteristics .....	F. Declercq and H. Rogier	3050
A Printed, Broadband Luneburg Lens Antenna .....	C. Pfeiffer and A. Grbic	3055
Reducing the Number of Amplitude Controls in Radar Phased Arrays ....	M. D'Urso, M. G. Labate, and A. Buonanno	3060
Folded Reflectarrays With Shaped Beam Pattern for Foreign Object Debris Detection on Runways .....	A. Zeitler, J. Lanteri, C. Pichot, C. Migliaccio, P. Feil, and W. Menzel	3065
Iterative Algorithm for Probe Calibration in Spherical Near-Field Antenna Measurement .....	D. Sánchez-Escuderos, M. Baquero-Escudero, J. I. Herranz-Herruzo, and F. Vico-Bondía	3069
A Modified Wheeler Cap Method for Efficiency Measurements of Probe-Fed Patch Antennas With Multiple Resonances .....	C. Cho, I. Park, and H. Choo	3074
On the Accuracy of Three Different Six Stages SS-FDTD Methods for Modeling Narrow-Band Electromagnetic Applications .....	O. Ramadan	3078
Error Analysis for Matrix Factorizations Using Non-Overlapped Localizing Basis Functions .....	X. Xu, Y. Xu, and R. J. Adams	3081
Electromagnetic Scattering by Finite Periodic Arrays Using the Characteristic Basis Function and Adaptive Integral Methods .....	L. Hu, L.-W. Li, and R. Mittra	3086
Applying the Optical Theorem in a Finite-Difference Time-Domain Simulation of Light Scattering .....	C.-H. Tsai, S.-H. Chang, and S. H. Tseng	3091
Optimization of Reduced-Size Smooth-Walled Conical Horns Using BoR-FDTD and Genetic Algorithm .....	A. Rolland, M. Ettorre, M. Drissi, L. Le Coq, and R. Sauleau	3094
A Miniaturized Hilbert Inverted-F Antenna for Wireless Sensor Network Applications .....	J.-T. Huang, J.-H. Shiao, and J.-M. Wu	3100

---
